GitHub Pages, not Neocities

Publishing the site (one time)

1. Create a public GitHub repository (e.g. baton-rouge-alternative).
2. Unzip the package and upload the contents into the repo root.
   index.html and content.json must be next to each other at the top level.
3. Commit to the main branch.
4. Settings > Pages > Build and deployment > Deploy from a branch.
5. Choose main and /(root), then Save. Visit the Pages URL shown there.
6. Future commits to main publish automatically. No Neocities needed.

How to add or change something

1. Upload a new file to music/, art/, poetry/, or articles/.
2. Open content.json in the GitHub file editor.
3. Add an entry in the matching JSON array using its exact file path.
4. Commit the change. GitHub Pages will publish the update.

What is automatic, and what is not

Automatic: GitHub republishes when files are committed to main.

Manual: you must list new work in content.json (this is intentional).

MP3s: upload them with their entries, including any album cover.

Remember: filenames are case-sensitive, and JSON must have valid commas.

```
Keep each new .mp3/.txt/image alongside its content.json entry.
The website is static; there is no build command or database.
```

Editing content.json

A song (one card)

```
{
  "title": "Your Song",
  "artist": "Your Artist",
  "url": "music/your-song.mp3"
}
```

Songs in one album (give every song the same album)

```
{
  "title": "Your Song",
  "artist": "Your Artist",
  "album": "Your EP Name",
  "url": "music/your-ep/your-song.mp3",
  "cover": "music/your-ep/your-cover.jpg"
}
```

Art / poem / article entries

```
{ "title": "Artwork", "artist": "Name", "url": "art/picture.png" }
{ "title": "Poem", "artist": "Name", "url": "poetry/poem.txt" }
{ "title": "Article", "artist": "Name", "url": "articles/story.txt" }
```

Poem or article text file format:

```
> Your Title by Your Name

First line of your work
    An indented line
Another paragraph or stanza
```

Spacing is preserved. Tabs are eight columns in arranged poems.

Narrow phones allow sideways scrolling rather than changing the poem.

```
Be sure new paths exist. Do not change border unless needed.

The README.md in the ZIP contains fuller troubleshooting tips.
```
